

Access Control · Public, Job & Gang

Public

```
access = { type = 'public' }
```

Any player can use the bench, subject to normal distance and recipe validation.

Job

```
access = {  
  type = 'job',  
  jobs = { 'police', 'mechanic' },  
  minGrade = 2  
}
```

Supported on QBCore and ESX.

Gang

```
access = {  
  type = 'gang',  
  gangs = { 'ballas', 'lostmc' },  
  minGrade = 1  
}
```

Gang access is built into the QBCore bridge.

Normalization

The access resolver accepts common forms such as `list`, plural keys (`jobs`, `gangs`), singular keys, names and comma/space-separated strings.
