Bundled FiveM License Resource

Bundled FiveM License Resource

The source package includes:

```
integrations/fivem_resource/nord_forge_license
```

This resource provides a reusable FiveM-side Nord Forge license integration.

Default configuration

```
Config = {}
Config.ForgeApi = 'https://nord-forge.lunarocketeer.com'
Config.ForgeKeyConvar = 'nord_license'
Config.KeymasterConvar = 'nord_keymaster'
Config.AutoBind = false
Config.Debug = false
```

`AutoBind` is disabled by default, matching the production requirement that customers register servers manually in Forge.

Public exports

```
exports.nord_forge_license:ValidateProduct(product, callback)
exports.nord_forge_license:CreateSession(product, buildId, callback)
exports.nord_forge_license:IsValidated(product)
exports.nord_forge_license:GetSessionKey(product)
```

Console command

The integration also includes the `nordforge_check` server command for validation checks.
