Step 4 — Download the Resource

Step 4 — Download the Resource

Once the product is assigned to your account:

1. Open **My Products**.
2. Select the resource.
3. Review the latest version and changelog.
4. Check for configuration changes or database migrations.
5. Download the latest release.

Before updating an existing resource

Check whether the release contains:

- Critical update warnings
- Configuration changes
- Database migrations
- Compatibility notes
- New dependencies

Back up your current configuration and database before installing a major update.
