Registering Stashes & Custom Inventories

Registering Stashes & Custom Inventories

Dynamic storage registration from another server resource.

Applies to: `Nord Inventory v2.0.0`

```
exports.nord_inventory:RegisterStash(
    'mechanic_storage',
    'Mechanic Storage',
    80,
    250000,
    false,
    { mechanic = 0 },
    vector3(0.0, 0.0, 0.0)
)
```

For more general storage:

```
exports.nord_inventory:RegisterInventory('my_inventory_id', {
    label = 'My Inventory',
    slots = 40,
    maxWeight = 100000
})
```

Register storage from trusted server code and open it through the public inventory API.
