Vehicle Storage Exports

Vehicle Storage Exports

Capacity queries for other vehicle/garage resources.

Applies to: `Nord Inventory v2.0.0`

```
GetVehicleStorageCapacity(invType, modelHash, vehicleClass)
GetVehicleTrunkWeight(modelHash, vehicleClass)
GetVehicleTrunkSlots(modelHash, vehicleClass)
GetVehicleGloveboxWeight(modelHash, vehicleClass)
GetVehicleGloveboxSlots(modelHash, vehicleClass)
```

These exports let garages/dealerships/admin tools show the same capacities Nord Inventory will actually enforce.
