Key Types

Nord Vehicle Keys uses different key types for different access lifecycles.

Key type	Typical use	Persistence
`owner`	Player-owned vehicle	Permanent
`shared`	Shared access	Permanent or timed
`temporary`	Rentals/scripts	Timed
`session`	Stolen/NPC vehicle	Temporary session
`admin`	Administrative grant	Permanent until removed

When a physical key item is issued, metadata includes at least:

```
{
    plate = 'ABC123',
    keyType = 'owner',
    expiresAt = 0,
    sessionToken = ''
}
```

Session keys use a session token that is validated server-side and cannot be reused by another player connection.
