Production Checklist

Before production deployment:

- [ ] OneSync enabled.
- [ ] Database backups available.
- [ ] `oxmysql` starts before Nord Vehicle Keys.
- [ ] Framework bridge detected correctly.
- [ ] Inventory bridge selected correctly.
- [ ] `vehicle_key` definition is non-stackable when using Nord Inventory.
- [ ] Recovery ACE configured only for staff who need it.
- [ ] Ownership table/columns match your framework schema.
- [ ] Custom bridge code returns valid values and does not trust arbitrary client payloads.
- [ ] Test owner key issue/removal.
- [ ] Test player key sharing and revocation.
- [ ] Test stolen key removal after exiting the vehicle.
- [ ] Test recovery NPC key reissue.
- [ ] Test ghost placement cancel/confirm.
- [ ] Test lock state with multiple players nearby.
